Alberta Liberal Leader Enunciates Policy

Mr. W. R. Howson, M.L.A., Liberal leader in Alberta spoke at a well-attended meeting at the Opera House on Tuesday evening, when he enunciated the policy of the Liberal party in provincial affairs. He stated that their policy was a complete reorganization of every department of the government in order to increase efficiency and to eliminate waste, duplication and unnecessary expense, which, he claimed, existed at the present time.

He severely criticized the present government and made the broad statement that while revenues had been doubled, and the provincial debt more than doubled, there were very little more services than when the present government went into power.

Mr. Howson admitted that there had been considerable road building, but stated that full values of roads and bridges, which amounted to a little over \$29,000,000, had been paid for out of revenue which had been derived from proceeds of the automobile license and gasoline tax.

He pointed to the telephone debt as a sample of mismanagement of the government and claimed that instead of scrapping a large portion of the rural lines it should have been made possible for farmers to have retained their phones at a price they could have paid.

He appealed to the audience as taxpayers to see that the increasing of the mortgage on the province, now amounted to \$140,000,000 should be stopped, and stated that 50c out of every \$1.00 received in taxes went to pay debt charges.

Mr. Howson said that the government should not be built on narrow lines, but should have within its ranks men who are directly connected with all the basic interests of agriculture, mining, merchandising, and lumbering, as well as the laboring force operating these.

Didsbury Calf Club Holds First Fair

The Didsbury Dairy Calf Club, which was organized this spring held its first calf club fair at Community Hall last Wednesday, and the showing was very commendable.

Each member exhibited a calf which they had cared for during the summer and honors went to Tom Clarke's Jersey calf. Mr. Andrews, of the department of agriculture, acted as judge of the classes.

Raising calves is only part of the work of the club, the members also having received instruction in cattle judging. In the cattle judging competition the winners were: Tom Clarke, Delbert Levagood, Jeanne McDonald and Wilma Liesemer.

From these four will be chosen two to go to Edmonton to compete with teams from all parts of Alberta.

The members of the club have taken great interest in the work, and Professor Elliott, of the Vermilion School of Agriculture, who has had charge of the work, deserves credit for the success attained. It is expected that there will be a much larger membership next season.

List of prizewinners

1. Tom Clarke \$6.00
2. Harvey Stevens \$5.00
3. Stanley Green \$4.00
4. Lorne Liesemer \$3.00
5. Harold Shultz \$2.00

Louise Shultz, Wilma Liesemer, Edith Bruce, Donald Shultz, Henry Brown, Jeanne McDonald, \$1.00 each.

The government provides two-thirds of the prize money awarded and one-third is provided by the club.

Mr. W. A. Austin occupied the chair, and short addresses were also given by Mr. R. Edmondson, president of the Alberta Liberal Association, and Mr. J. J. Boslan, M.L.A. of Calgary.

LOCAL & GENERAL

Mr. and Mrs. C. H. Edgett, of Calgary, spent the past week with Mr. and Mrs. J. J. Steekley.

Dr. McEwan, of Noddy, was a Sunday visitor with Mr. and Mrs. W. J. Scheidt.

Dr. Clarke returned home from Edmonton last weekend. We are pleased to see he is able to be around again.

Bert Cressman, who has spent the summer at his homestead in the Raven River district, is back for the threshing season.

Rev. A. J. Mitchell, Mrs. Mitchell and Miss Grace Raiton motored to Calgary on Monday. Mrs. Mitchell will visit her daughter for a few days.

Mr. and Mrs. George Julien left Monday for Rimbey, Alta. George is on his vacation and is looking out for good hunting grounds.

Mr. and Mrs. Beuchler, of Long Beach, Cal., visited with the latter's sister Mrs. W. J. Hilliard over the weekend. They left Monday for Wainwright, Alta.

Al Studer and George Julien could not get out to Fresh after ducks last Friday on account of the roads, so they stuck to the gravel and hunted in the Sylvan lake and Alis districts.

Mrs. Allen Hunsperger and daughter Miss Knith, who spent a couple of weeks at the coast, returned home Saturday. While away they visited Mrs. Hunsperger's sister Mrs. Geo. Ryckman at Bellingham, Wash. and Mr. Hunsperger's sister, Mrs. M. Ryckman at Chilliwack, B.C.

Mr. and Mrs. J. W. Moon, Mrs. Eble and Mrs. J. Booth, all of Anawau, Ill., motored to Didsbury last week and will spend a short time here. Mr. Moon has business interests in the district. He stated that this district showed far better crops than any of the country he passed through during the trip.

Mr. Alfred Speakman, M.P. will give an address at the regular meeting of the Canadian Legion to be held in the Odd Fellows' Hall on Saturday, September 23rd. Mr. Speakman has interested himself in all matters relating to returned men during his term of office at Ottawa, and he no doubt will have matters of interest to discuss. All members should be present at this meeting.

Hunting Season Opens.

Quite a number of the local sportsmen called up their shotguns and went after the birds on Friday.

They report that ducks are more plentiful this year and some nice bags are reported.

George Hawkes got his limit the first day, and G. McKenzie-Grievs and Larry Levens bagged seventeen the first afternoon.

Hungarians are plentiful and there should be some good shooting during the next month.

Liberal Constituency Will Organize

A meeting of Liberals from all parts of the Didsbury constituency was held in Didsbury on Tuesday afternoon, when Mr. W. R. Howson, Liberal leader in the province, and Mr. Roy Edmondson, the provincial president were present.

An arrangement committee, with Mr. W. A. Austin as chairman and Mr. G. E. Roberts as secretary, was elected to make arrangements for an organization meeting to be held at Aene in the near future.

Donate Vegetables.

The splendid vegetables which were exhibited at the Community Hall school fair, and the vegetables used to decorate the Anglican Church at the harvest festival, were all donated to the Didsbury General Hospital.

The matrons and nurses of the hospital wish to thank both these organizations for their kindness.

They also wish to thank the Rev. H. J. Wood for donations of vegetables.

Obituary.

WILLIAM PEAR

Funeral services for Mr. William Pear took place at the Knox United Church on Tuesday, with the Rev. A. J. Mitchell officiating.

Deceased was 78 years of age and was born in Ontario. He came to Didsbury in 1907 and homesteaded east of town. He was pre-deceased by his wife, who died in December of last year.

One son, Victor, and a daughter survive to mourn his loss.

Town Council.

The regular meeting of the town council was held at the High School on Monday evening with Mayor Chambers in the chair and all the councillors present.

A letter was read from Mr. J. V. Berscht, tendering his resignation as chairman of the local board of health. The resignation was accepted and a by-law passed appointing Mr. C. H. Ashdown to fill the unexpired term.

It was reported that the provincial medical health officer had made an inspection of the town and ordered improvements in sanitary conditions in a number of places.

It was decided that the town in conjunction with the Mountain View municipality should gravel the road leading east past the Hospital, each paying half the expense.

The question of arrears of business taxes was thoroughly discussed and it was decided to proceed to distraint for taxes in all cases where a satisfactory arrangement for the payment of taxes had not been made.

Community Hall School Fair.

The school fair held at Community Hall on Wednesday of last week was one of the most successful held in the district. There was a large number of entries in every section and the quality of the exhibits was particularly good.

The judges complimented the association on the excellence of the fair and remarked that it was the best fair they had attended this year.

The schools which took part in the fair were: Rosbush, Neapolis, Grand Centre, Mona and Jutland.

There was a good program of school sports during the afternoon and Jutland school was successful in winning the relay race.

Rally Day Service.

On Sunday next, September 24th at 11 a.m. the Knox United Sunday school will hold their annual Rally Day service, to which all parents and friends are heartily invited.

A special program of music, readings and stories, as well as the service for promotion, will be given.

Come and enjoy this Rally Day Service.

WORLD HAPPENINGS BRIEFLY TOLD

Russia had a favorable balance of trade for the first six months of 1933 — for the first time since 1929.

Gold held by the Minister of Finance on July 31 was \$71,929,268 or \$601,832 in excess of statutory requirements. Dominion notes in circulation totalled \$182,113,568.

Twenty million feet of British Columbia lumber have left for world markets. Three-quarters of it is destined for China on the Dominion-subsidized service.

High import duties and other emergency measures will be continued as part of the Italian government's program to maintain a sound internal wheat market. Premier Mussolini has announced.

Raymond Bonincaire, France's war president, was serenaded by the town band while he received felicitations from neighbors in a quiet celebration of his 73rd birthday at his summer estate at Sempigny, France.

Caught in full foliage by a surprise snowstorm on August 21, trees were broken and flower gardens ruined at Butte, Montana. The maximum temperature for the day was 44 and the minimum 31.

Captain William J. Webber, 65, steward at Pictou Hall during the term of Earl Grey as governor-general, and for many years on the staff of the Dominion archives, died recently at his home in Ottawa.

New cosmic ray studies announced by Dr. Robert A. Millikan, of New York, indicate these rays constitute a power-house of energy from 30 to 300 times greater than all the rest of the radiant energy in the universe.

One of the men who discovered the route to Klondike gold fields via Great Slave Lake and Yukon River, Robert Hogarth Milvain, 76, is dead at his home in Snowhill, England, according to word reaching Calgary. He was a pioneer resident of Calgary, locating there in 1856 to become a noted horseman and polo player.

Fragment Of First Cable

Fisherman Brings Up Piece Of Line Laid In 1853

While hauling his trawls off Cape Ray recently a fisherman dragged up from the ocean floor a fragment of the first submarine telegraph cable used in American waters. It was a piece of the line laid in 1853 by Professor Samuel Morse and Cyrus W. Field between Aspy Bay, Cape Breton, and Cape Ray. The cable was manufactured in England, the first stranded conductor ever made. Despite its long immersion, the insulation retained its color of gutta serena. Until 1866 the eastern extremity of telegraphic communication was Cape Race. Off that point westbound ocean liners dropped overboard canisters containing European newspapers and dispatches and telegrams from passengers. A boat was always stationed there to pick up canisters. Newspaper men condemned the dispatches and put them on the wire bringing news of world events to New York ahead of the steamships.

Speeding Up Mail

Fast Plane Is Undergoing Final Tests In England

Speedy mail plane which can fly at 200 miles an hour, is undergoing final tests in England. It is fitted with special apparatus for dropping and picking up mails while in flight, and in all 40,000 ft., weighing half-ton, can be carried. These could be flown from London to Cape Town in 48 hours and from London to every country in Europe, with the exception of Turkey and Greece, in less than seven hours.

Knit Own Wool Blankets

The low price which Canadian farmers' wives receive for their wool has introduced the knitted blanket to Manitoba farm homes. The Manitoba Handicraft Guild has shown them how to knit blankets from the raw wool pulled out into loose, thick strands.

Small mine owners in Bolivia find it difficult to get workers.

W. N. U. 2029

Aluminum Ore Found

Discovery Is Reported To Be First In Canada

Discovery in the Kinsinto district of a great body of aluminum ore-bearing clay has been reported to the government by Dr. David Flood, geologist, who has spent six years investigating in the north country. He states that the discovery is one of the most important to have been made in the history of the province.

Early development of the area, which lies five miles northeast of Kinsinto, is forecast by Dr. Flood, who has made a full report to the government on his find.

The discovery also means, according to the geologist, the earlier development of the hydro-electric project east of Prince Albert, the proposed site of which is just 12 miles from the ore-bearing clay.

This is the first discovery of its kind in Canada. Mr. Flood said there is a small deposit of aluminum in Arkansas, but the bulk of the world supply comes from British Guiana. Dr. Flood, who is a native of Sweden, also touched upon the other mineral possibilities of Northern Saskatchewan and stated that North Saskatchewan would one day produce gold, silver and nickel. He found them all, he declared, in his wanderings as chief geologist for a big syndicate.

Recipes For This Week

(By Betty Barclay)

EMERALD ECHO SALAD

- 1 package lime-flavored gelatin.
- 1 pint warm water.
- 5 cup canned crushed pineapple, drained.
- 3 tablespoons pimiento, cut in strips.

Dissolve gelatin in warm water. Pour 1/2-inch layer in loaf pan. Chill until firm. Chill remaining gelatin mixture until cold and syrupy. Place in bowl of cracked ice or ice water and whip with rotary egg beater, until fluffy and thick like whipped cream. Fold in pimiento and pimiento. Pour over firm first layer. Chill for one hour. Unmold on crisp lettuce or chicory. Serve with mayonnaise. Serves 8.

CORN SOUFFLE

Mix in a saucepan two tablespoons of flour with one tablespoon melted butter. Pour in slowly one cup of milk. Bring to the boiling point. Add one can of corn, one teaspoon sugar, one teaspoon salt, pepper to taste, and the well-beaten yolks of two eggs. Fold in the whites of the eggs, beaten stiff. Then turn into a buttered baking dish, and bake for thirty minutes in a moderate oven. Serve immediately.

Checking Up On Wild Fowl

United States Naturalist Makes Tour Of North Land

No estimate of the prospects awaiting local mounds was forthcoming from Luther J. Goldman, field naturalist and biologist of the United States Department of Agriculture, who was in Prince Albert recently.

Mr. Goldman has been making an extensive trip studying migratory bird conditions on behalf of his department.

"The vast areas of Canada's northland, of which, because of its nature, we have only scratched the surface, forbids any estimate of increase or decrease in the number of ducks year by year," said the investigator.

The drought conditions of the south, which have driven the birds from usual nesting places, will also have its effect on this year's duck breeding, thought Mr. Goldman.

Leaving Calgary in June, Mr. Goldman has travelled over a large area including the southern portion of Alberta and Saskatchewan, then on into the north. He now expects to swing into northern Manitoba, then on to eastern Canada, and back to the States, where he will report on conditions prevailing in Canada which information is used by the United States department in setting the bag and time limits for the open season.

Landscape does not have to be scrubbed so often if varnished or shellacked, they warned.

AN EXCEEDINGLY WEARABLE DRESS

All you have to decide is the color. Whether you want a dress for street, afternoon, or office wear, here's your number.

For town and office wear, it looks so smart and trim in light navy blue crepe silk. And it takes but 4 1/2 yards of 20-inch material for the 36-inch bust.

Prints in crepe silk in blue and white or in red and white are stunning too.

For afternoons, grey or beige crepe silk is especially nice. Note the chic sleeve detail to give the fashionable wider shoulder line. And the bias seaming that makes the bodice "fitting."

It's a very simple model to make. There are so few major parts to the pattern.

Style No. 749 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 42 inches bust.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Lays Foundation Of Fortune

Indiana Man Plants Walnut Trees As Legacy For Daughter

By planting, in his spare time, 14,000 walnut trees on 29 acres of cut-over land, J. E. Lennon, of Washington, Indiana, has laid the foundation of a fortune for his young daughter.

In 40 years, according to the national forestry department, 8,000 of the trees should have survived and reached maturity. They will be worth, at present, low prices, \$160,000 as timber wood. Should the daughter wish to keep them, they should in 40 years be producing an average of one bushel of nuts, each which at \$1 per bushel will give her an annual \$8,000 income.

Not To Be Ought

"The company promoter was trying to raise capital for a new scheme. "I'm telling you," he said to a financier, "it will make gigantic strides later on. Just now, of course, it's only in its infancy."

"Perhaps," replied the financier; "but I'm not in mine."

Wonderful models of aeroplanes used for official tests are made by a leading Englishman in his kitchen.

Wrestles With Octopus

Girl Makes Spectacular Picture While Father Grinds Camera

A girl has to have the proper scientific spirit—or maybe just plain spunk—to dive into a tank with an octopus and stage a wrestling match for a periscope under-water movie camera.

Florida Douglas, 17, Menlo Park, California, did just that for her father, Leon Douglas, inventor of a periscope camera and enthusiast about deep sea science.

Douglas directed a spectacular reel would be one of a "death" struggle with an octopus. He got the picture—stretching 12 feet from arm to arm—from some fishermen.

"I'll take him on," volunteered Douglas' 17-year-old daughter, Florence. "Who's afraid of an old octopus?"

But Douglas gasped, Douglas declared, but Florence won. It was an anxious moment when the slim girl dove into the tank, and the slimy tentacles of the ocean monster wrapped about her. Mrs. Douglas didn't watch; she went for a walk in the garden.

Douglas ground his camera as long as he dared, then signalled "the actors" that it was time to stop. But the octopus was unused to stage directions. Men stationed about the edge of the pool dived in, and it took the combined strength of several to extricate Florence.

For several days she bore the red marks of the tentacle suckers on her arms and legs, but the picture came out beautifully.

"I wasn't afraid of the octopus, but it was kind of slimy," Miss Douglas said.

Meteor and Planet Collide

Explains White Spot On Saturn Opinion Of Astronomers

A terrific collision between a giant meteor and Saturn is believed to have caused the white spot on Saturn, according to astronomers at the United States Naval Observatory. Astronomers as a possible cause of the white spot that has appeared on the planet.

The spot appears to be about the size of the earth, nearly 8,000 miles across, but that does not necessarily mean that a meteor as large as the earth hit Saturn, astronomers said.

The spot as seen from the earth is possibly a cloud of dust in the atmosphere that surrounds Saturn. Such a cloud might have been produced by the fall of a huge meteor or by a giant volcanic eruption from inside the planet. The dust cloud might be considerably larger than the meteor or eruption that caused it.

The white spot, standing out plainly as against Saturn's yellow background, is being used by astronomers to check up on the exact speed of the big planet's rotation.

Calf Was Good Swimmer

Two of a load of calves being transported by truck across Montreal's harbor front recently escaped from the truck, the truck off the city and was soon caught, but the other headed for the river and, swimming downstream had gone nearly a mile before being lassoed and brought to shore in a fast motorboat.

Dairy Cattle Killed

Several head of pure bred dairy cattle being shipped from British Columbia points to Shanghai, were killed in mid-ocean when the deck-load of lumber on board the steamer "City of Victoria," shifted. The ship returned to Port Alberni, B.C., with a heavy list.

Willing To Practise

Jack suddenly appeared to be interested in matters of etiquette.

"If I were invited out to dinner, Mummie, should I be right in eating apple pie with a fork?"

"Certainly, dear," replied Mummie. "You haven't a pie I could practice on, have you, Mummie?"

One Obstacle Removed

A 94-year-old man has just received a letter from a V. M. College, Spartanburg, South Carolina. 72 years after he first entered the school. At least in interviewing prospective employers he won't be told he is too young for the job.

Spain has been cutting down its unfavorable trade balance.

Canada A Healthy Nation

Bulletin Of Life Insurance Company Gives Interesting Facts

The lowest mortality on record was registered for the first six months of 1933 among nearly 1,250,000 Canadian industrial policyholders of the Metropolitan Life Insurance Company and the prospect of a new minimum death rate being established in Canada in 1933 is considered excellent.

The death rate for all causes combined among this group of Canadians is 4.6 per cent. lower than for the first half of last year. Canadians are making a better health record this year than are United States industrial policyholders, for the death rate of the latter is running well over three per cent. higher than for the first six months of 1932.

Reductions among Canadian policyholders from previous years are due to diseases of major interest, according to the insurance company's statistical bulletin, are as follows: diphtheria, 5.7 per cent.; tuberculosis, 1.6 per cent.; diarrheal conditions, 1.7 per cent.; typhoid fever, 5.7 per cent.; and measles, 12 per cent.

Pointing out a number of decided contrasts in the course of the death rates from important diseases this year in Canada and the United States, the bulletin says:

"The mortality from diabetes, which had been steadily rising in both countries for years, has recorded a considerable drop in Canada; in the United States the marked upward trend is still persisting.

The heart disease death rate is unchanged this year in Canada, whereas in the United States cardiac conditions have been responsible for many more deaths than in the like part of 1932.

"The cancer mortality rate has risen only negligibly in Canada; but it has come up appreciably in the United States. Deaths from pneumonia, on the other hand, have increased a little in Canada as compared with a pronounced drop in the United States to a new low point."

An Underground Farm

Mushrooms To Be Grown In Funnies English Caves

England may soon have its first agricultural industry to be conducted 120 feet below ground. If experiments now under way are successful, the famous Chislehurst Caves, near London, will be converted into the greatest mushroom growing center in the country. The British Mushroom Company has been started to farm the caves. W. E. Masters, one of the principals, said: "The caves are ideal for growing mushrooms, which need darkness to develop, and a constant temperature. Several miles of the tunnels will at first be under cultivation." Chislehurst Caves are among the most famous in the world. The remains of a prehistoric monster, which archaeologists believe to be 250,000 years old, are embedded in the rock.

Preventing Silver Waste

Loss In U.S. Runs To Thousands Of Dollars Annually

Science is endeavoring to find some convenient way to recover the one hundred tons of silver that is annually dissolved away in developing photographs in the United States. The value of the metal at current prices is nearly \$800,000. Experiments by research workers indicate that the process of electrolysis proves more effective than the other methods. Electrolytic methods employed at one large film studio saved \$17,000 in six months. Twelve hundred trays of silver could be regained from every million feet of film developed.

A Minor Complaint

Mrs. Alva Johnson of Okemah has asked for a divorce from her husband. The court asked her on what grounds she desired to lay this charge, and the lady replied that she had no particular complaint against him only he had not been home since 1929.

Thirty-three thousand, three hundred and seven sheep, 22,571 easts, 162,248 hogs, and 32 calves were shipped from western to eastern Canada during the first twenty-four weeks of this year.

morning after?
How Eno wakes you up, banishes heaviness, refreshes! Take a glass of Eno—and feel a different person

TAKE ENO'S FRUIT SALT

OCCASIONAL WIFE
BY EDNA ROY WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Allison, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park, outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means, but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends. After taking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist. Camilla wonders why he did not ask her to go out again. In school they are cool to one another, and for a few days things go badly between them until he again meets her sitting in the park.

(Now Go On With the Story)

CHAPTER VI

Camilla's shy smile was like an appeal to Peter to understand everything she knew and didn't know about herself. Some instinct told him that she needed him, yet he feared to remain. He glanced away through the leafy green of new leaves toward the glistening white walls of the museum.

"I live pretty much around here, day and night. You know I teach a beginner's class over there three evenings a week."

"Oh, do you?" her eager face lightened. "Then, that is why I haven't seen you, isn't it?"

"Yes, I've been—pretty busy," his words stumbled awkwardly. "I can't keep late hours often with so many responsibilities."

"Then I shouldn't have kept you out late on Tuesday night," remorsefully.

"Oh, once in a while can't hurt me," he laughed, "and it's not that I can't stand the pace, but the profs won't stand for it."

"I'm sorry. Did you get razzed about Tuesday?"

"Oh, no."

"Why didn't you tell me you had classes of your own? I shouldn't have suggested—"

"We had a good time, didn't we?" "Wonderful! Did you?"

"Best in my life!" he declared.

"Then you haven't avoided me because you were angry with me?" hesitantly.

"Of course not! And I haven't tried to avoid you," he prevaricated. "What made you think that?"

"Well," her eyes followed the toe of her slipper as it drew imaginarily

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It steadies the nerves... makes you eat better... sleep better... relieves periodic headaches and backache... makes trying days enjoyable.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

W. N. U. 2009

lines in the grass, "you didn't call again, or ask to see me."

"But I wanted to," the words were impulsive, and spoken before he knew it.

She looked up at him again with shining eyes. "Then it's all right," she said softly.

"You really cared that I didn't call on you?"

"Yes, very much."

"I'm sorry," he said gently. "I should have phoned you, even if I was busy."

"And please don't think you have to take me places that keep you out late, just to see me." She forfeited her last ounce of pride in a final desperate appeal.

"What could we do, then?"

"Why—we might sit here and just talk, or you could come to my house."

"I'd prefer it here."

"So should I."

He wondered if he could be dreaming. Could it be possible that Camilla Hoyt preferred to come and sit in the park with him, to the society of her friends and their favorite haunts?

"Do you mean that you would like to come here—and talk with me—sometimes?"

"Any time I often come here and sit alone in the evening. I never know, though, that you were teaching over there, so near me."

"And I never knew you were so near, either. Will you be here, tonight?"

"Do you want me to be?"

"Very much. I'll be finished at nine o'clock."

"Then I'll be here," she promised. They walked on together to the parkway and separated happily in anticipation of the evening. Peter tried to reprove himself for what he had done. He had resolved that the only way to manage his attraction for Camilla was to forget her and stay away from her. It would be a long time before he could forget—probably he never could—but he had

"It's about the longest hour I ever had," he confessed.

"Shall we walk a little? It's a marvelous night, isn't it?"

"Perfect. I like to walk around here at night. It all seems so different than in the daylight. Did you ever feel like that—as if a place that is very familiar to you in the day were a different place at night?"

"Yes, I've thought that, too. It's something like the difference between the way people appear to be and the way they are, isn't it?"

"Why," he exclaimed with surprise, "you funny little thing! I never knew you could be so serious."

"You see, I am like this park by day and by night—a dual personality. You know the me who sketches poorly in Professor Drake's class, but you don't know the me who comes to sit alone in the park and try to think things out."

"I like both of you." His voice was deeply tender with the effort of suppressed emotion.

"But you don't know either of me," she objected, holding up her finger in a warning gesture.

"Perhaps better than you think."

"But you must not like me very much."

He felt repinned for his boldness. "I know I shouldn't be so presuming. But I wonder why you came here tonight to meet me?"

"Because I have to tell you something that I want you to know about me. I just can't go on letting you think I'm—"

"Are you sure that you should tell me anything about yourself?" he interrupted hastily. "I shouldn't want you to tell me something you might regret later."

"You are not interested. You don't want to listen."

"Of course," he assured her earnestly. "That is just the trouble. I am too interested in you. I have been, ever since the first day I saw you in Drake's class. I'll always remember the minute you walked into that

He found her there as she had said she would be.

room," he reminisced with pleasure. "You have been in my thoughts ever since."

She sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fearful apprehension. Was she going to tell him that she was engaged to marry some other fellow in her price class? Probably. But she didn't act very happy about it. And why should she tell him—

ROYAL YEAST CAKES
the best dry yeast for home baking..

Try this Easy-to-Make Recipe for FORM CAKE

Cream 1 1/2 cup sugar with 1/4 cup butter. Add to 1 beaten egg and beat until light. Add 1 cup lukewarm milk. Stir well. Add 1 cup Royal Yeast Sponge, 1/4 cup citron, 1/4 cup raisins, 1/4 cup chopped almonds, 1/4 teaspoon salt, and enough flour to make soft dough (about 4 cups). Knead well. Cover and set aside in warm place for draughts to the unit double in bulk (about 1 1/2 hours). Knead down and place in well-greased tube pan. Brush top with egg and bake in moderate oven about 45 min.

ROYAL YEAST SPONGE:

Soak 1 Royal Yeast Cake in 1/2 pint lukewarm water for 25 minutes. Dissolve 1 tablespoon sugar in 1/2 pint milk. Add to dissolved yeast cake. Add 1 quart bread flour. Beat thoroughly. Cover and let rise overnight to double in bulk. In warm place free from draughts. Makes 5 to 6 cups of batter.

BUY MADE-IN-CANADA GOODS

ROYAL YEAST CAKES have been the standard for over 50 years. Keep a supply on hand to use when you bake at home. Sealed in airtight waxed paper they keep fresh for months.

And get your copy of the ROYAL YEAST BAKE BOOK containing 23 practical, tested recipes for delicious breads. Address Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Doing a Good Business

Rush of Pilgrims To Wishing Well In Scotland

Strong denunciation by Highland ministers and the recent campaign by the Sabbath Observance Association against the famous Wishing Well at Culloiden, in Scotland, has resulted in a rush of pilgrims to the well, which is the greatest in its history. Thousands are dropping coins into the water and making a wish. Some, according to ancient practice, tie a piece of cloth to nearby trees, and these are now almost covered with tiny pieces of textiles. The money dropped into the well is recovered and donated to charities, which are getting record amounts.

Homes Receive Profit

Profits received from the sale of the phonograph record of the inaugural speech of the King at the opening of the World's Monetary and Economic Conference, have been designated by His Majesty to Dr. Barnardo's Homes.

(To Be Continued.)

Little Helps For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeremiah 29:2.

Thy thoughts are good, and Thou art kind.

Even when we think it not; How many an anxious faithless mind Sits grieving over its lot.

Sadhearted, never to day and night, As though God lost it out of sight, And all its wants forgot.

P. Gerhardt.

You should never complain of your birth, your training, your work, your hardships, and never to think you could be something if only you had a different lot or sphere assigned you. For God understands His own plan, and He knows what you want a good deal better than you do. The very things you most deprecate as fatal limitations or obstructions, are probably what you most need. What you call hindrances, obstacles, and discouragements, are probably God's opportunities. Bring down your soul, or rather bring it up, to receive God's will and do His work, under the law of charity, against your temptations, and then you shall find your condition is never opposed to your good, but really consistent with it. H. Bushnell.

By a new law Spain will establish settlers on expropriated lands.

You Can Afford New Creamed Dishes Every Day When You Use

ST. CHARLES MILK

Use Borden's St. Charles Milk—you will find it economical, convenient and wonderfully handy for making delicious creamed dishes. Every time you use it, you and your family will notice the improved flavor of your cooking. Use it whenever a recipe calls for milk.

HEAVY PARA-SANI WAXED PAPER
Get the Green Box. Keep it in your kitchen always. Borden's.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile—Without Calomel

Your liver's a very small organ, but it certainly can get your digestion and elimination organs out of order, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't recognize the earliest such a condition, by taking an acid, mineral water, laxative candy or other stomachic cathartic. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back your liver's normal action. They're made of vegetable matter alone. They're made by name. Follow instructions. Don't ask druggists.

WEEKLY SERMONETTE

"Little winds are wounded by
little things"

WEEKLY JOKE

The clear wearing prices of the
bead dog show was sensational at
three times more by some members
of the younger fair sex:

"Look at that youngster," said he,
"there's white-rumped hair, cigarette
and trousers, holding two pops.
Is it a boy or a girl?"

"A girl," said his companion,
"she's my daughter!"

"My dear sir," (the vicar was
flustered) "forgive me. I would
never have been so outspoken had I
known you were her father."

"I'm not," said the other, "I'm
her mother."

Western Canada Finances Its Crop

So long has the belief persisted
that Canadian banks utilized eastern
depositors' funds to finance western
agriculture, that figures presented by
the western subsection of the Canadian
Bankers' Association are nothing
short of astounding, commented J.F.
Perceval, deputy provincial treasurer
recently.

The statement presented by the
association before the banking com-
mission had revealed deposits in the
prairie provinces January 1 last of
\$294,000,000 in round figures, as
against only \$286,000,000 total bank
loans to agriculture.

"Either there has been an enormous
increase in the savings of the
western people in recent years, or
there has been a drastic curtailment
of bank credit for commercial activities
and farming on the prairies. Bank
figures presented showed that
only a decade ago loans were double
the deposits, while 20 years ago
loans were three times the total of
prairie deposits."

"Of loans charged to agriculture
\$99,836,000 were secured by grain.
There would probably be but a small
portion of these loans made directly
to the farmer, but in most cases to
the grain companies on security of
the product of the primary producer
and indirectly to his benefit," said
Mr. Perceval by way of interpretation
of the bank statement.

"However, this indicated that
western depositors provided the
banks with the funds to finance the
western crops," he remarked.

Another item showed that part of
the total prairie loans was an amount
of \$1,465,000 to farmers and ranch-
ers. New loans made to farmers
and ranchers during 1932 totaled
\$8,801,000, and during the year
\$14,406,000 were collected.

—Herald.

How About That Subscription?

A Woman at Banff

I know God fashioned little fields
So they would be
A comfort for old homely folk
Like you and me.
Small gardens with their fences
Sugared tight,
And tiny gates to shut us
From the night.
But THIS He made with
Glory in His veins,
This solitude, where Might
Forever reigns.
Molded the hills with glad
Exultant hands,
Shaping the valleys for
Wide pasture lands.
And so this towering peak
Forever bears,
Old finger-marks upon
Its rugged stairs.

This solitude, where Might
Forever reigns.
Molded the hills with glad
Exultant hands,
Shaping the valleys for
Wide pasture lands.
And so this towering peak
Forever bears,
Old finger-marks upon
Its rugged stairs.

And every shining height
Reflects the glow
Of some white virgin field
Of drifted snow.
And over it he laid
With loving care
The mantle of His peace
Forever there.

Passes Away**

As we go to press we learn of the death of Mr. John Brade, who died at the home of his daughter, Mrs. H. H. Snyder this (Thursday) morning, at the age of 76 years.

The funeral service will be held at the home of Mr. W. H. Snyder at 1 p.m. and at the M.B.C. Church at 2:30 p.m. Saturday, September 22d.

Joint Program for Hog Improvement.

Provincial and federal departments of agriculture, railways, packing companies, stockyards will combine in an aggressive campaign during the coming fall and winter with the object of bringing about an extensive improvement in the quality of hogs marketed in Alberta, according to an announcement made last week by Hon. Geo. Hoadley. While last year Alberta marketed nearly a third of the total marketings of hogs in Canada, the percentage of top grades was only 8 per cent. A very extensive improvement in quality is necessary if the province is to have a full share in the enlarged marketing possibilities of the British market under the new quota scheme, it is pointed out.

Dry Areas Relief Program.

Arrangements for feeding of stock in the dry areas were announced last week following completion of negotiations between the provincial and federal governments and railways. Shipments of cattle and sheep to winter feeding locations will be undertaken for owners of such in the dry areas, freight costs being borne by the railways, province and dominion. The wintering of work horses is also provided for in cases where the horses can be driven to feed locations. Loans will be made available to owners of these horses to the extent of 60 cents a head per month on a maximum of 15 head for each farmer. Feed for necessary work horses, milch cows, hogs and poultry will be shipped in free of freight to the farmer, and loans for purchase of this feed will be made available up to a value of \$100.00 for each farmer.

Alfalfa For Hogs.

A test has been conducted at the Dominion experimental station at Lacombe with fall-farrowed pigs, by self-feeding three groups of pigs a similar grain ration during the growing and finishing period with 7 per cent. alfalfa meal added to the ration in one lot, and a mixed supplement (30 per cent. tankage, 15 per cent. fish meal, 20 per cent. oilcake meal and 15 per cent. alfalfa meal) also fed to the rate of 7 per cent. to the second lot. A third lot was used as a check and fed the grain ration with water only. The alfalfa meal was made by putting through a feed grinder good quality baled alfalfa hay grown in central Alberta. In order to obtain more authentic information a similar experiment was repeated the following year. Based on the 2-year average results, valuing oats at 25c per bushel and barley at 30c per bushel, it was shown that on the basis of grain saved, alfalfa meal, costing 95c per 100-lbs., had an actual value of \$2.50 per 100-lbs., and the mixed supplement costing \$1.33 per 100-lbs., had an actual value of \$3.08 per 100-lbs. Judging from the foregoing results, a mixed supplement is more apt to supply the necessary nutrients and mineral matter than a single supplement.

Results of experiments at Lacombe have also indicated that while alfalfa meal has proven of value as a protein and mineral supplement in our winter experiments, when the feeding of grain with 7 per cent. alfalfa meal has been checked against the feeding of grain alone, it has not rated high in comparison with dairy by-products or tankage. Its high fibre content tends to cut down the gains.

Though alfalfa meal will not replace the dairy by-products or tankage in the feeding of fall pigs for market, it will provide roughage which is helpful to brood sows. It may be fed in racks, or ground and fed with the grain.

H. E. Wilson.

Here and There

It is corn roast time in Canada, one of the two national outdoor festivals in the Dominion with which the passing of the years does not seem to interfere. The other is "sugarin' off" at maple sugar time in the early days of spring.

Canadian Pacific Railway experimental train at Calgary took honours in the sheep judging at the Canadian Pacific Exhibition held recently at Vancouver with two firsts in each of the range, ewes and pens classes, five seconds and the grand champion Suffolk ram and ewe champion.

Keeping well in the forefront of the golfing world in Canada, the Seniors Club, Mapleboro, Quebec, has recently placed a women's golf tournament and has followed this up by the tournament of the Canadian Senior Golfers Association. Both were well patronized, the latter drawing a big and prominent entry from the United States.

The world's valuable deposits of coal and iron lie with the Atlantic nations rather than with those who front on the Pacific, the discussions of the fifth biennial conference of the Pacific Relations Institute held recently at the Banff Springs Hotel, revealed. The fact enters largely into the problems of the countries of the Pacific.

Figures from the Dominion Bureau of Statistics draw attention to the safety of railway travel in Canada. In collisions only two fatalities occurred among a total of more than 21 million passengers. Passengers injured numbered only 339. Other fatalities bringing the total up to seven were due to such causes as falling from trains or in getting on or off trains. The figures are for the year to March 31, 1982.

Striking success of the centennial coach travel plan inaugurated last May and June by Canadian railways, providing full facilities for trans-Canada excursions, east and west, is the justification of its repetition on the same scale during September. C. P. Riddell, chairman, Canadian Passenger Association, announces, "Two great eras of travel will again be set in motion, one from the west to the east and the other from the east to the west."

Starting with the commencement of the round trip from Southampton at the end of August, the Empress of Britain for the following twelve weeks will be engaged upon what amounts to a continuous voyage of 40,820 miles.

In the course of this voyage the ship will spend a total of eighty days actually under way," was the statement of George Stephen, vice-president of traffic, Canadian Pacific Railway, who was a passenger on an August sailing.

You will prefer it,

Canada As a Leader.

Judged in terms of years, Canada is a very young country, and this fact has brought home to any one who studies the histories of the countries of Europe and Asia, Canada, too, while a country great in area, is of sparse population and in this respect is nowise comparable to the older countries of Asia and Europe, or of the United States.

But during its brief history, Canada and the Canadian people have achieved some truly great things and pioneered in numerous fields which have resulted in conferring outstanding benefits upon all mankind.

Our thoughts are turned in this direction by the centenary of one very notable Canadian achievement. On August 5, 1925, Canadians celebrated the passing of one hundred years since the first vessel crossed the Atlantic Ocean, any ocean in fact,—steaming the whole way. It was a Canadian vessel, the "Royal William," built at Quebec and launched on April 29, 1821, and with Canadian built machinery except the cranks and shaft, which made this epoch voyage, sailing from Pictou, Nova Scotia, on August 5, 1835, for London, England.

Other vessels had previously crossed the seas using steam to a certain extent, but no other vessel had ever made the voyage with "steam up" all the way. According to an account of this world-famous vessel appearing in the August number of the Canadian Geographical Journal, the "Royal William" actually established seven primary records,—two Canadian records, three foreign records, and two world records.

The "Royal William" was: (1) The first steaming steamer ever built in Canada; (2) the first steamer that ever plied on intercontinental afloat,—from Quebec to Halifax; (3) the first steamer that ever entered a U.S. harbor under the Union Jack; (4) the first steam transport in Portugal; (5) the first steam man-of-war in Spain; (6) the first vessel in the world that ever first steamed a short action under steam; (7) the first vessel that ever crossed any ocean steaming the whole way.

In celebration of the centenary of this last mentioned achievement the Canadian Government has issued a special commemorative postage stamp which, unquestionably, will be greatly prized by stamp collectors throughout the world, and which will serve to bring to people in all lands knowledge of this great Canadian achievement of one hundred years ago.

This centenary of the "Royal William" also serves to remind one of other outstanding achievements standing to the credit of Canada, young in years as this Dominion is in relation to other nations. Canadians can recall with pride that it was one of their countrymen, Andrew Graham Bell, who invented the telephone, thus giving to the world one of its most useful and widely used means of communication.

It was a Canadian who developed Marquis wheat, the effect of which has been to greatly extend the area of the world's surface in which wheat can be successfully grown, and it has been Canadians who have continued that work and developed still earlier ripening varieties such as Garnet and Reward.

Great in area but small in population and wealth, Canada has built up in the Canadian Pacific Railway the greatest transportation system in the world. There are other great railways, other great steamship companies, other great telegraph, express and hotel companies, but no other company in the world combines all these services to the same extent, and with the same world-wide ramifications as does the C.P.R. The inauguration of the Canadian Pacific was a tremendous undertaking for a mere handful of people in an enormous but undeveloped country, and its success is a tribute to Canadian initiative, energy and determination.

A Canadian gave insulin to the world, that wonderful agency of relief to the diabetic sufferers of the world, and which has prolonged the life of thousands of people afflicted with such disease.

Nor is it a small matter that through the efforts of a few millions of people they have made their country, Canada, the fifth trading nation in a world of trading nations, surpassed only by other, much more populous and wealthier nations.

There are many other fields in which Canada, during its brief history, has led the world, but neither time nor space will permit of extending this recital; sufficient has been recorded here to establish the truth that Canadians have reason to entertain great pride in their country and in its achievements. Nay more, that there is every reason why the people of Canada should have unbounded confidence in the future of their country. All nations throughout the world's history have suffered temporary reverses and setbacks; all have passed through periods of depression and hardship. But where the hearts of the people have been true, where they have not been given over to indulgence and sloth, where they have maintained their virility and strength, where they have been courageous and determined, they have always risen above their troubles and reverses, and gone forward to greater achievements, greater glory, greater prosperity and happiness.

All Canada's past history provides an incentive and encouragement to the Canadian people of today. Opportunity has not ceased to knock at the door of Canada. The future holds more of promise than anything yet realized if our people seize the occasion when "Opportunity" does knock.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these untoward discharges there is a remedy in Dr. Foster's Extract of Wild Strawberry, a remedy that has been on the market for the past 35 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

World's First Black Rose

No Sign Of Shading Appears In Fragrant Petals

Flowering under the watchful eyes of numerous park attendants, the world's first black rose, pride of the great Stangerhausen rosearium, is drawing throngs of visitors to this small Harz town.

The unique flower, the creation of which was recently announced, is a cross between two extremely dark varieties of roses—"Chateau de Cho Vougeot" and "Lord Castleburgh." It is of a velvety deep black-red hue, so dark—especially in dry, hot weather—that it may be described as black. Thet fragrant petals show no shading whatever.

Some 400,000 roses in 9,000 varieties are on display. Most of the credit for this achievement belongs to 80-year-old Professor Ewald Gnau, supervisor of the gardens, who is affectionately known as the "rose-nator" (father of the roses).

SHE LOST 32 lbs.

New Frocks No Longer Worried Her

"How did she lose that 32 lbs. of fat?" is what you'll be asking. Let her tell you herself.

"About 18 months ago I weighed 175 lbs.—which I can assure you annoyed me very much. Everything seemed a worry to me, especially new clothes. Nothing would fit me comfortably and walking was unbearable. I was advised by a friend to try Kreschen Sitz, and I am very glad I did. Yes. During the first ten months I lost 28 lbs. of fat. Now, for the last 6 months my weight has been 146 lbs. and I feel much better in health. I have all my weight tickets to substantiate my statements."—(Mrs.) M. P.

Kreschen contains those six mineral salts, proportionately balanced, found in the waters of those famous European spas used by generations of fat people to reduce weight.

"Kreschen" helps blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel younger—look better, work better.

Poison Antidote

Discover Effective Medium To Offset Effects Of Carbon Monoxide Poisoning

Discovery of a sulphate-sodium antidote more effective against carbon monoxide poisoning than anything previously known is claimed in a report published in New York by John H. Draize of the University of Wyoming.

The antidote likewise surpasses anything else in effectiveness against cyanide poisoning, he says. He credits the cyanide discovery to F. Borsetti, an Italian scientist.

The antidote is sodium tetrathionate, a well known inorganic chemical. Its constituents are sulphur and sodium. Draize used it by intravenous injection on poisoned rabbits.

Has Massive Program

Russia Planned Big Increase In Production This Year

With the launching of the second Five-Year Plan, Russia has outlined a programme of massive production for this year. For 1933 big increases are planned in agriculture, electricity, coal, oil, iron and other metals, machinery, chemicals and in general manufacturing. Thus, whereas in 1932 about 61,000,000 tons of coal were produced, 84,000,000 are budgeted for this year, and the output of 6,000,000 tons of steel in 1932 is to be increased to nearly 9,000,000 tons. It is also planned to raise the number of cattle from less than 5,000,000 in 1932 to 9,000,000, and that of pigs from 4,000,000 to 5,900,000.

Land For Ships

Considerable backing has been given in Australia to the proposal recently made by Dr. Duldig, the Italian Catholic Archbishop of Brisbane, that the mandated territory of New Guinea be handed back to Germany on condition that Germany contribute adequate ships for Australia's defence. Mandates for the former German possessions in the Pacific were divided among Australia, Japan and New Zealand.

Back taxes are being paid in wood in Carlintha, Austria.

Experiments In Taxation

Record Of English History Shows Very Few Things Escaped

There have been many strange experiments in taxation in English history. Henry the Eighth taxed boards, and graduated the tax according to the position of the wearer. The Sheriff of Canterbury was constrained to pay the sum of three shillings and fourpence for the privilege of wearing whiskers. Elizabeth likewise put a similar tax on every board of over a fortnight's growth. Elizabeth was also bent on making the country of a religious turn of mind, and all who stayed away from church on Sunday rendered themselves liable to a fine. In 1695 it was decided that births should be taxed. The birth of a child to a Duke cost the proud father thirty pounds in taxes, whilst the coming of a commoner child into the world was made the occasion of a tax of two shillings. Bachelors and widowers were compelled to pay for the privilege of single blessedness. It was William Pitt who instituted the window-tax. In the reign of George the First it was necessary to have a license in order to sell hats. Then there was a tax on hair powder and a tax on watches and clocks. In the reign of George the Third a duty of two shillings and sixpence was imposed on bricks. At a later period in the same reign bricks were divided, for the purpose of taxation, into common and dressed bricks, and the duty on each class of brick was regulated according to its size.

Paid For Grumbling

Man In England Earns Good Living Finding Fault

A London man earns a living by going round the city finding fault with everything. One day he went into a big tea shop and found that the shape of the teacups they used was clumsy. It was impossible to drink out of them without spilling the tea. So he wrote to the company about it and the cups were changed. He wrote to the London Underground and told them that passengers could alight at a certain station without presenting a ticket. Upon another occasion he saw that a big sign in the West End of the city was not working properly. He told the company owning it that anyone standing on the other side of the street could not read it, and it was changed. His job arose from a life-long habit. If ever he saw anything wrong he used to write to the owner about it. He merely used to do it as a matter of principle, but when he was out of a job he suggested that if his criticisms were of any use he should be paid for them. Now he makes a handsome income from being a grumbler!

Good Crop Of Hay

Thousand Tons Cut At The Pus During Two Weeks

More than 1,000 tons of hay were cut for local use during two weeks in the Carrot River Triangle, all within a 15-mile radius of The Pus, according to estimates made there.

Several outfits have been operating in the area. Hay is good this year. High water did not affect it. It is of better quality than for many years past, haymen say.

A. St. Godard cut 400 tons, Transport Limited 200, and others including Frechette, Allard, as well as settlers of the Carrot River Valley, smaller lots.

The farmers of The Pus reserve have also garnered enough for winter fodder.

LUNCHEON TOMATOES

Two cups cooked tomatoes; 2 cup sweetened condensed milk; 2 cups dry bread, broken in pieces; 1 teaspoon salt; 1/2 teaspoon pepper. Grated American Cheese Heat tomatoes to boiling point. Add sweetened condensed milk and stir until well blended. Remove from fire, add bread and seasonings. Cover tightly two minutes. Pour into serving dish, sprinkle generously with grated cheese. Serves at once. Serves six.

Radium contains a tremendous store of energy. Although it gradually breaks up, only half of a given quantity will disappear in 1,800 years.

Cyclists of New Zealand are to be compelled to observe traffic rules.

One Good Roll

Deserves Another

This is what men say when they make the acquaintance of OGDEN'S fine cut cigarette tobacco.

It rolls more easily—that is the first thing that you discover—then light up, and learn the rest of the good news. Sweeter, more fragrant, mellow—all any smoker could ask in a fine cigarette.

That's why so many men have tried it—liked it—stuck to it. Use Chantrelle cigarette papers with it and you will get a still better smoke.

SAVE THE POKER HANDS

OGDEN'S

FINE CUT

Your Pipe Knows OGDEN'S Cut Plug

Tea Is Old Beverage

Beverage Used Long Before Beginning Of Christian Era

Tea was known long before the beginning of the Christian era, and though by the thirteenth century it was a universal drink in China it was not until nearly four hundred years later that Europe began to hear of tea through the Portuguese and the Dutch. The first Englishman to mention tea was a Mr. Wickham in 1615. He wrote from Japan to a friend asking for three silver porringers from which to drink tea. Tea was first sold publicly in England in 1657. It fetched from 15s. to 50s. a lb. in the leaf. It was also sold in liquid form, made, as the vendor said, according to the directions of the most knowing merchants and travellers in the East. The year 1839 was a date never to be forgotten in the history of the British Empire, for it was the year in which Empire-grown tea was first sold in England.

This Check Is Different

A bronze lion, twelve feet high, which will roar at noon, and a cock, six feet high, which will crow at sunrise and sunset, are features of a huge new clock erected in Messina, Sicily.

First Crossing Of Atlantic By A Vessel Using Steam Was Made A Hundred Years Ago

This year marks the centenary of the first crossing of the Atlantic Ocean by a vessel using steam all the way. The historic voyage was made by a Canadian-built wood-n paddle-steamer, the "Royal William." To commemorate this notable event the Canadian Post Office Department is issuing a special postage stamp.

The "Royal William," built at Quebec, was launched in April, 1831, and towed to Montreal to be fitted with engines developing 200 horse-power. Her cost when ready for sea was \$75,000. Her dimensions were: length over all 176 feet; depth of hold 18 feet; breadth over paddleboxes, 44 feet. She was originally intended to ply between Montreal and Quebec and Nova Scotia, and the enterprise of building her was carried out by a group of Quebec and Halifax merchants, assisted by a grant of \$15,000 from the Government of Lower Canada. Among the shareholders appear the names of three Cunard brothers, one of whom later founded the present Cunard Line.

After three moderately successful voyages in 1831 to Halifax and intermediate ports she laid up for the winter. In 1832, owing to a cholera epidemic, she made only one voyage, and her owners became bankrupt.

In the spring of 1833 a new company was formed, which purchased the vessel and, for a time, used her for towing and local excursions. Then in June, 1833, she sailed on a trip to Boston, where she was enthusiastically received as being the first steamship flying the Union Jack to enter a United States port.

On her return to Quebec her owners decided to send her to England for sale. It was on this voyage that she made history, demonstrating to the world the feasibility of navigating the oceans by means of steam-propelled vessels, notwithstanding the declaration of critics that "they might as well talk of making a voyage from Quebec to the moon."

Early in August, 1833, she left Quebec for Pictou, in the Northumberland Strait, where she remained a few days coaling, storing, repairing engines, and awaiting passengers. Eventually, on August 17th, she steamed out of Pictou Harbour for England. Her clearance papers stated she was a vessel of 249 tons bound for London, that among the goods carried were 254 children of coal (648 tons), a consignment of ships' spars, a box of stuffed birds, one harp, one box, one trunk, household furniture and seven passengers, all British. Her master was Captain McDougall. During the voyage the starboard engine was disabled and the vessel sprang a leak. After 25 eventful days and nights the "Royal William" arrived at Gravesend. Ten days later the vessel was sold for \$50,000 and chartered to the Portuguese Government as a troopship. Captain McDougall retained command and took her out to Lisbon, where she was successfully offered for sale to the Portuguese.

In 1834 the ship was bought by the Spaniards, sent to Gravesend to be converted into a "war-steamer" and renamed the "Yabel Segunda." Later she returned to the Spanish coast, and on May 5, 1836, in the Bay of San Sebastian, she earned the distinction of being the first steamer of war to fire a hostile shot. In 1840 she was sent to Bordeaux for repairs but was converted into a bulk. Her engines were transferred to a new ship of the same name, which ultimately sank off the Algerian coast during a violent storm in 1860.

And so, with her hull rotting in Bordeaux harbour, and her engines lying at the bottom of the Mediterranean Sea, the "Royal William" ended her distinguished and varied career.

A memorial tablet in the Canadian House of Commons commemorates the first trans-Atlantic voyage by the "Royal William."

France is testing out a new type of vest pocket warship.

Lives High Above World

Home Of Forest Reserve Guardian 8,120 Feet Above Sea Level

Perched on a narrow patch of crumbled rock, 8,120 feet above sea level, where he lives all summer as one of the provincial government's Bow River forest reserve guardians, Arthur Shantz told a reporter that "it'd be all right if I could keep the place warm and the government would give me enough paint to cover the cabin."

Those were the only complaints about a job which keeps him high above the world, sometimes for more than a month without seeing another human being. His domain is only 50 feet wide by 50 feet long.

The lumber for the shack occupied by Shantz, who likes to call himself the "Old Man of the Mountains," was hauled up the mountain by hand at considerable risk and expense.

By Ruth Rogers

MODISH AND SLENDERIZING LINES HAS THIS LOVELY DAYTIME DRESS

Here's a charming model for the heavier figure. The partial belt treatment creates a lengthened line. The skirt while slender, indicates an easy flare at the hemline.

It is simple, smart and becoming in brown and white crisp crepe silk against a lilac-like yoke of white crepe. It's a dress that will carry you through an entire day.

It will cost you but a small sum to make it, and will take very little of your time. Plain grey, beige or black with white is delightfully lovely.

Style No. 643 is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards of 35-inch material with 1/2 yard of 35-inch contrast piping.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap carefully.

Canada's Fruit Crop

Apples Will Be Plentiful But Other Fruits Scarce

The Dominion Department of Agriculture estimates the 1933 crops of pears, peaches, grapes and plums will be lower than last year, but that apples will be more plentiful. In a survey published recently, the department placed an estimate of 4,438,000 barrels on the Canadian apple crop, compared with 3,977,000 barrels last year.

Canada's pear crop this year was estimated at 434,000 bushels, compared with 466,000 bushels last year. The peach crop was placed at 813,000 bushels, a drop of 91,000 bushels from 1932. The plum crop was estimated at 22,000 bushels, only 79 per cent. of last year's total due to failure in Ontario, the commercial grape crop was estimated at 54,568,000 pounds, compared with 54,100,000 pounds last year.

Trade Within Empire

Canada's Trade Shows Increasing Exports To Empire Countries

All British Empire countries, but the British West Indies, imported more goods from Canada during the first four months of the current fiscal year than for the corresponding period a year ago, according to figures issued by the Dominion Bureau of Statistics.

Australia's imports from Canada rose from \$2,068,263 to \$3,183,694 or 52.9 per cent., while those of the United Kingdom increased 34.8 per cent. from \$46,907,811 to \$63,222,280. Imports of Canadian goods into British India rose 25.9 per cent. to \$808,146 and to South Africa 16.6 per cent. to \$1,528,162. New Zealand's imports were up by 6.2 per cent. to \$1,095,533 and those of Newfoundland 1.1 per cent. to \$1,823,864.

Russians Cannot Own Dogs

Must Be Killed For Skins To Clothe Soviet Army

In a short while there will be no dogs in Russia. A new Soviet decree orders all owners of dogs to deliver their animals immediately to special dog pounds. The animals will be killed and their skins sent to Government fur factories to be converted into clothing for the Soviet Army. It is expected that 3,000,000 skins will be obtained in this manner, sufficient for the Army's requirements.

Idea Did Not Work

Following complaints of smaller merchants that department stores in Tokyo were injuring their business, the big stores in Tokyo were ordered to close three days every month. Now the smaller merchants report that on those days shoppers stay at home and the sales of stores remaining open have decreased.

Wheat Situation Is Discussed At Round Table Conference Of Pacific Relations Institute

Unridden To The Last

Bucking Horse Retires From Rodeos Still Unconquered

"Midnight," wildest of western stampee horses, has made his last appearance before a rodeo audience, taking the final curtain call in a cloud of dust at the Cheyenne round-up the other day. He will be retired to the green pastures.

"Midnight," perhaps the greatest bucking horse ever known to the rodeo world, plunged out of the Cheyenne arena chute and, reaching for the sky with his front feet, head down and hind feet joined ten feet above the ground, sent Turk Greenough of Red Lodge, Montana, 1933 Cheyenne round-up champion rider flying. Greenough stuck to "Midnight's" sleek, black back only two and a half seconds. The performance climaxed the big show and the Canadian horse was given a great hand by the crowd in the grandstand. He was unridden to the last.

Mighty "Midnight" was once a docile, sturdy cow pony of the Alberta foothills. One day a tumbleweed blew under his belly and sent him on his first bucking spree and on to fame! For a decade he has furnished thrills to rodeo crowds from Calgary to Tucson and now at seventeen years of age he will be taken away forever from the arena by his owner, Verne Elliott and Eddie McCarthy. They are retiring him to their ranch in the foothills.

The celebrated bucking bronc easily outstrips the meanest rodeo mount. He is more powerful, bigger, faster. He has the weight of a truck horse and the speed of a mustang. He goes mad when released from a chute but otherwise is kind and docile. "Born to buck—that animal," said an old-time cowboy recently. And that about sums it up.

The Friendly Border

Pat Campbell made the 500-mile trip from The Pas to Winnipeg with his dog outfit on the way to Chicago Fair and on reaching the border found that he would have to put up \$200 and \$2 for each dog entering the land of the free. Once again, says the Stratford Beacon-Herald, that is the same friendly international border about which erators speak at banquets.

The beauty of the house is order; the blessing of the house is contentment; the glory of the house is hospitality; the crown of the house is goodness.

Discussion of the wheat situation and its effect upon international relations marked a round-table conference of the Institute of Pacific Relations.

A Canadian delegate opened the discussion with an authoritative account of developments in Canadian wheat since 1925, the emergence of a serious glut, measures taken to cope with it, impact of foreign tariff upon Canada's export trade, and negotiations at Rome and elsewhere for coping with the situation.

Under present conditions the member said, the view is impracticable that the wheat growing industry of Western Canada may be described as bankrupt, and its plight is being aggravated by the chaotic condition of wheat acreage. He thought, however, there is considerable hope of advantage to the wheat grower in some international arrangement between the major wheat exporting countries whereby they would agree to establish between themselves a quota system for exports and to control deliveries. He believes such a scheme was feasible, and would not only help to raise the price level, but would, in a few years, result in a curtailment of acreage because farmers would not continue to grow wheat which they could not market.

If an export quota system were introduced it would be necessary to establish a wheat board which would keep export marketing within a single channel.

It was agreed if the process of industrialization continues in Japan she will be bound to seek food supplies in the cheapest market and will probably increase her import of wheat. A delegate from the Dutch East Indies declared the tendency of Java to import wheat is increasing. Expansion of the wheat market available in China is problematical. It was indicated, as many Chinese do not consider wheat flour a superior article of food, and there is also an increase of local wheat production.

Cougars Menace Ranchers

Residents Of West Coast Of Vancouver Island, Lose Livestock

Residents of Port Alice, on the west coast of Vancouver Island, walk the streets armed with shotguns and rifles to protect themselves and their property against marauding cougars that descend almost daily on the town.

Having exterminated the deer and fur-bearing animals in the district between Port Alice and Cape Scott, the cougars invade the yards and corrals of settlers and steal poultry, pigs and heifers, practically all the dogs have fallen prey to them. This information was brought by Rev. William Graver, of Port Alice. "Unless drastic action is taken soon many of the ranchers will be forced to abandon their ranches," Mr. Graver said.

Famous "Bull-Dog Ants"

Professor States Primitive Australian Insects Are Vicious Creatures

The only formidable "monsters" in the Australian bush are poisonous snakes and the famous "bull dog ants," according to Dr. William M. Wheeler, professor of entomology at Harvard University.

The "pincer" or primitive ants of Australia sometimes reach more than an inch in length, are "singularly" alert, wasp-like, large-eyed, long-jawed and ferociously stinging creatures. The larger species live in mound nests which may be from 1 to 5 feet in diameter and the population of a colony is from 150 to 200 individuals," said Dr. Wheeler.

Curtain For Parents

Window curtains will again strictly enforce a curfew law which provides that all children under the age of sixteen shall be in their homes by 9 p.m. The next arrangement should be for one of the parents to be home to receive them for experience shows that it is usually goodnight preparations which have been taken to cope with the situation. The Bradford Examiner.

Expeditions to the north and south poles are thrilling, but Lady Hubert Wilkins, wife of the famous Australian explorer, prefers the less adventurous life of domestic life. She is now in New York while her husband is with the Ellsworth Antarctic Expedition. Lady Wilkins plans to accompany her husband on one more polar trip and then settle down to real home life.

Honor Bride-Elect.

Miss Irene Grant, Nellie Wilson and Wynne Studer entertained at a miscellaneous shower at the latter's home Tuesday evening in honor of Miss Anne Pelechaty, whose marriage to Mr. Werd Wynan takes place this month.

The room was tastefully decorated in pink and white. Mrs. Kendrick presided at the treatable and Miss Flo. Reiber and Mrs. Mae Studer Campbell assisted in serving.

Those present were: Miss Anne Pelechaty, Miss Ruby Sproule, Mrs. Studer, Misses Ruth Liesemer, Alex Black, Nelda Huget, Rae Clements, Bea Kendrick, Maurine Saugstead, Lela Hunsperger, Orpha Liesemer, Edith Hunsperger, Mildred Lowrie, Vera Lowrie, Elva McEwen, Laura Smith, Joyce Moyle, Jean Russell, Marie Chambers, Edith Chambers, Margaret Geiger, Mae Royds, Alice Pearson and Helen Temperancey.

RUGBY NOTES

Friday evening last Mrs. Harvey Hoesgood entertained at a social gathering in honor of her sister Miss Marian Sissons, of Vermilion, and Miss Connie Hoesgood, who leaves shortly for the University of Alberta. A hilarious evening was spent, during which contests and games afforded much fun, after which the hostess served a dainty luncheon. Among those present were: Misses B. Evans, M. Johnston, G. Miller, E. Mann, A. Hoesgood. Messrs. C. Brown, W. Hughes, P. Geske, W. Dobson, O. Blain, W. Blain, H. Morton, E. McInnes, W. McInnes, P. Hoesgood, D. Hoesgood, and Mr. and Mrs. J. Hoesgood. All report a most enjoyable time.

Melvin Notes

Robert Greig is attending High School at Trochu.

Mr. and Mrs. G. Carlson spent a few days last week in Calgary.

Miss Doreen Farrant is helping Mrs. A. Krebs for a few weeks.

Mr. and Mrs. Ed. Parker visited with Mr. and Mrs. Chas. Young on Friday.

Miss Ruth Johnston, of Didsbury Hospital, visited her parents here on Sunday.

Miss Florence O'Brien and Miss Dorothy Young spent the weekend at Doralea with Mrs. Willows.

Miss Marian Johnston spent a few days in this week with her grandparents, Mr. and Mrs. Troyer.

Mr. and Mrs. E. McComb, of Calgary, called on Mr. and Mrs. Chas. Young on Tuesday.

Miss Mildred Brown, of Airdrie, and Miss Florence Bissett, of Byron school, spent the weekend with Mrs. W. Davies and Mrs. Chas. Young.

Mr. and Mrs. Elmer Cowitz and Donnie, of Didsbury, Mr. Phillips, of Calgary, and Mr. and Mrs. H. Bliss, of Bowden, spent Sunday with Mr. and Mrs. A. Krebs.

CARD OF THANKS

For the innumerable kindnesses and tender sympathies extended us during our sad bereavement, we wish to record our sincerest thanks to the Rev. G. J. Hallman for the beautiful solo rendered, and to friends and neighbors for individual wreaths, as well as to organizations; to the minister for use of the church. Our prayer is that sorrow such as we have been called upon to bear, may be far removed from each of you.
Mrs. R. C. Oldham and Family.

LOCAL & GENERAL

Miss Lily Campbell is relieving at the local telephone office during the absence of Miss Lucille Smith.

Mr. and Mrs. H. C. Speelman motored to Michichi on Sunday to visit with Mrs. Speelman's parents.

The signs which were recently painted on the front of the Berscht store are quite attractive and add to the appearance of the store.

Miss Lucille Smith underwent an operation for appendicitis Monday. We are pleased to report that she is progressing favorably.

The subject of the sermon at Zion Evangelical Church next Sunday morning will be, "Bastful Christians," and in the evening, "Spiritual Blindness."

Mr. and Mrs. John Fleury, Mr. and Mrs. J. A. McGhee and Mr. Bob Shannon fished in the Big Bow near De Winton on Sunday. They landed a few nice rainbow trout.

Can You Beat It?

Mr. J. V. Berscht reports that one of the sunflowers in his garden measures 10 ft. 4 in.

Mr. John Wesley says he has several pumpkins weighing 40 and 50-lbs. in his garden east of the tracks.
